Claim Rejections Under 35 USC § 102 and 103

On page 2 of the Office Action, the Examiner rejected Claims 1-4, 6-7, 9-10 under 35 USC §102(b) as being anticipated by Daly. On page 2 of the Office Action, the Examiner rejected Claims 5 and 8 USC §103 as being unpatentable over Daly. Daly is completely silent with respect to the mounting position of an electric motor and the heating of an electric motor in a throttle to melt an ice blockage. The Examiner has failed to explain how and why the claimed subject matter is rendered unpatentable over the prior art and point out where each of the specific limitations recited in the rejected claims is found in the prior art relied on. Daly does not teach or suggest the present invention.

If the Examiner relies on personal knowledge that mounting an operation of the electrical motor of the present invention is obvious in light of the cited art, Applicants respectfully request support for this assertion in the form of an affidavit that shall be subject to contradiction or explanation by the affidavits of the Applicant and other persons under 37 C.F.R. 1.104 (d)(2).
